

March 26, 2018

To whom it may concern:

JLL served as the project management firm for the Evoqua Water Technologies relocation from Warrendale, PA to 210 Sixth Street, Pittsburgh, PA 15222. Through a hard bid competitive process, Shannon Construction was awarded as the general contractor. The relocation involved three floors of demo and new interior buildouts for a total of 55,789 sqft. Evoqua Water Technologies new office headquarters' construction was completed in September 2017 on-time and within budget. With many onsite existing conditions and design changes, I was pleased with Shannon Construction's quality of workmanship and level of communication through all aspects of the project.

I believe that one would not be disappointed with the quality of work, communication, and ability to meet deadlines. Please contact me at 724 679 1403 if you any questions.

Sincerely,

Scott Smith
