

TGI Fridays

Project: Expansion of Restaurant
Architect: Richard D. Jaynes Architect LLC
Owner: The Bristro Group
Location: Pittsburgh International Airport

Shannon Construction Company was contracted to relocate the existing bar from the rear of the restaurant to the front, without interrupting business. This task was achieved by having a phased schedule and running two shifts.

All new mechanicals had to tie in with the existing as well as new finishes.

New ceiling had to be consistent with the existing ceiling lines at the restaurant ceiling area.

A tincraft ceiling was installed at the bar area and custom wood with cabinetry was designed and installed. All new light fixtures were installed to enhance the dining experience.
