**Shannon Construction Company
50th Anniversary Being Celebrated**
Pittsburgh-Area Headquartered
Construction Company Hitting a Milestone

Pittsburgh, PA, March 31, 2021- Shannon Construction Co., a mid sized, locally owned construction company with its headquarters located in Dormont, PA, is celebrating its 50th year in business. Shannon Construction will celebrate this milestone with its employees, partners, and clients in various ways throughout the year.

In March of 1971, George Schultz began Shannon Construction Company, formed after participating in a partnership with Larson Builders. His partners retired, but George knew he'd found his passion, fueled by his knowledge of the construction industry. Shannon Construction was born. George recognized that interior renovations were the future for Shannon Construction. In 1983, Ken Schultz, George's son and Purdue University graduate in Construction Management, joined the family business to continue the construction legacy.

In 2000, [Ken Schultz](#) became President after the passing of George Schultz. With this position came the responsibility of ensuring Shannon Construction Company would thrive for many years. During Ken's tenure, Shannon Construction has increased significantly in size and is regarded as a leader in commercial renovation, building, and construction services in this region.

"Shannon Construction has successfully moved from being a Pittsburgh construction firm working on small to medium-sized projects to a large multi-million dollar regional business with projects that are significant in scope and size. Every project, no matter the size, is given the same

attention to detail and service. We were built on that and pride ourselves on it," said [Rich Amberson](#), Executive Vice President and newest Partner at Shannon. "We have assembled a talented team of professionals with expertise and a wide range of skills and abilities."

Shannon Construction Co. built its legacy over 50 years renovating space throughout the Pittsburgh region as a general contractor. Shannon's hallmark client service is exemplified through our decades of service to clients that include the Pittsburgh Airmall since 1983, projects at USS Tower since 1985, and work in every major office tower and retail facility in the region. Today, Shannon Construction has worked to ensure cutting-edge technology while still embodying the heritage and legacy of fine craftsmanship developed during their early years. It continues to grow by expanding its renovation and building services in the Pittsburgh area and its expanded geographic footprint.

During George Schultz's time, he led construction projects that included building: Scafe Hall of Engineering at CMU, the Executive building in Mt. Lebanon, Donaldson's Crossroads in Peters Township, countless church renovations, and building Asbury Senior Living in Mt. Lebanon.

Shannon Construction has kept the old school skills and the 'Can-Do' philosophy started in 1971 while combining it with today's newest technology and construction practices to advance its capabilities. Shannon Construction has re-invented itself, successfully moving into the future while maintaining its core values that include focus on clients for life, taking care of our employees, and building a quality tomorrow.
